

Task Scheduler Pro: Revision History

Ver Build Released On

3.02 100414 April 22, 2010

- Added: Support for Vista
- Added: Support for Windows 7
- Added: Support for Server 2008
- Added: Support for Server 2008 R2
- Fixed: Licensing Issue
- Fixed: Could not edit certain task properties

2.13 070507 June 21, 2007

- Fixed: Licensing Issue
- Fixed: Trigger Count issue when using database for datastore
- Fixed: Could not modify Run As account when editing "All Properties"
- Fixed: Scheduled Refresh was not updating information in system/task list

2.12 070124 January 25, 2007

- Improved: database connection process
- Resolved: when editing the task's schedule from the Edit | Schedule dialogue, tasks would be set to "Run Now"

2.07 060601 June 2, 2006

- Added scheduled "task refresh"
- Updated the help documentation
- Updated tool UI to be consistent with other tools
- Fixed a bug where dynamic group update jobs would fail and cause the deferred processor to crash
- Suppressed a log message when checking for dynamic group update times
- Fixed a bug where scheduled jobs would run immediately
- Fixed a graphic bug in the version info in the about dialog
- Fixed a bug where service data and AT account data was being gathered for update reports

- Fixed a bug that would cause exceptions in the log on timeouts
- Fixed a bug that caused the main display to stop sorting
- Fixed a bug in the reporting code that would cause every other row to be blank

1.57 050512 May 12, 2005

1.54 050223 February 25, 2005

- Changed: Improved logging of errors encountered when setting account information for Tasks
- Fixed: Problems with database storage, copying and pasting of task information, and terminal services management

1.53 040909 September 10, 2004

- Fixed: Problems with service account set when run from deferred processor
- Minor bug fixes to program operation

1.52 040729 July 29, 2004

- Improved: Minor bug fixes

1.51 040721 July 21, 2004

- Added: vnc connection connection option to system sub-item menus
- Added: option to store task data in mdb database
- Improved: fixed errors in retrieving task trigger list for disabled tasks
- Improved: fixed bug in terminal services menu item
- Improved: fixed link to internal help
- Improved: cleaned up logging messages for database and VNC operations
- Improved: optimized database load times
- Improved: updated appearance and product icons
- Improved: made quick task interface consistent by allowing blank credentials (gives warning, but allows blank credentials)
- Improved: updated installer to latest version of wise and made it smarter

1.50 040630 June 30, 2004

- Updated: Added a timeout option for job scheduling page so that tasks won't outside of the hour in which they're supposed to run
- Updated: Revised documentation
- Added: Integration with VNC and Terminal Server for complete remote control of workstations and services

1.46 040604 June 4, 2004

- Updated: Various bug fixes

1.45 040422 April 22, 2004

1.43 040209 February 9, 2004

1.41 031126 December 10, 2003

- Added A Select Invert option to the Manager Service Group Dialog and to the View menu.
- Added reporting on windows service packs.
- Added reporting on Microsoft Internet Explorer Updates.
- Added the report generator with output types for the service pack reporting.
- Consolidated the menus in the Manage Service Group Dialog.
- Added Cached Tasks
- Added Quick Tasks with file copy and run copied file
- Added a time and date column to show the time of creation for cached tasks.
- Added Dynamic Resizing to the Main Dialog and Manage Service Group dialog.
- New reboot dialog and new send message dialog with auto starting of the messenger service
- Added version and role columns to the task view
- Added Tip of the Day text file

1.40 0309025 September 2, 2003

- Added Run Task Now option for new and edited tasks.

- New reboot dialog and new send message dialog with auto starting of the messenger service.

1.37 030609 June 9, 2003

- Updated to use new shared dialogs

1.36 030313 March 13, 2003

- Added ability to do machine-specific task scheduler operations (AT Service account, task log) from non-task views
- Added pre-startup check to ensure that Windows Task Scheduler is installed before opening application - this limits functionality, but should prevent problems which are arising from using TSP on a machine without the Task Scheduler installed

1.35 030310 March 10, 2003

1.34 030102 January 2, 2003

- Updated code to use new style file browse dialogs when available

1.33 021108 November 8, 2002

- Added Fade-in
- Added Tip of the Day
- Added Revision History and Quickstart links
- Added new about box
- Added revised logon info dialog
- Changed splash screen behavior

1.32 021017 October 17, 2002

- New look (splash, icons, bitmaps)

1.31 021010 October 10, 2002

- Integrated XP-theme file as resource (no need for file anymore)

1.30 020925 September 25, 2002

- Added warning message for cascading server selections to all tasks on server

1.29 020923 September 23, 2002

1.28 020812 August 12, 2002

- Added create directory on file push
- Added processing for wildcards in file push
- Added more error logging for setting AT Service account

1.27 020808 August 8, 2002

- Added workaround for problem of account information being lost when editing and canceling edit of task

1.26 020726 July 26, 2002

- New licensing stuff

1.20 020322 March 22, 2002

- Added ability to change AT Service account on machines

1.11 020216 February 16, 2002

- Added ability for Change RunAs account to pick up account info (if it's the same for all tasks being changed)
- Removed spurious warning log message
- Reset status display after job creation
- Increased delay time before pulling results from start/stop operation

1.10 020215 February 15, 2002

- First Public Release
- Added online help
- Added ability to push files with every change

1.0 020611 June 11, 2002

- Added support for new WinXP look
- Added task rename feature
- Made progress bars more accurate
- Improved handling of tasks running under AT Service account
- Removed assert dialog (now only log file message)
- Added better error message for "Windows Scheduler not installed" error
- Added intelligent sort to main list for dates
- [internal] Integrated shared utility library
- Changed install script to check for Windows NT
- Added come internal integrity checking (anti-piracy)
- Removed non-functional Logon Cache feature from product (only in SAM)
- Updated Set dialog/message to be more TSP-specific
- More work on AT Service account feature
- Changed behavior for switching views; no auto-refresh by default
- Removed misleading log message about LookupAccountSid failing
- Added redistributable ShFolder.dll installer in install script (Installation now removes existing deferred processing service to ensure overwrite)
- Added ability to change AT Service account on machines
- Added display of jobs running under AT Service account
- Temp task is now always disabled
- Performing task operations with systems selected now selects all tasks under systems
- Added more icons for tasks, and modified display criteria for clarity
- Added disable for hard-refresh on switching to task view (hold down control key)
- Added deferred processing

0.9 020129 January 29, 2002

- Scheduler log files are now cached locally, in a subdirectory of the installation directory

- Controlled by registry entry WorkDirectory
- Uses system temp directory if WorkDirectory is not there or invalid
- Names of file indicate machine, cache date/time
- Worked-around problem with My Computer empty while browsing for app under XP
- RunAs account is now checked for each system task is added to (logged if unknown on system)
- Disabled some deferred processing stuff which wasn't implemented yet
- Added more logging
- Added copy/paste operation

0.8 020122 January 22, 2002

- Added "auto-find" for apps in path
- Added "Don't Show Again" option for local path warning and multi-edit warning
- Added automatic "hard-refresh" on change of view to Systems+Tasks
